

6-Month UI/UX Design Syllabus

Month 1: Introduction to UI/UX Design

Week 1-2: UX Basics

- What is UX Design?
- UX vs UI
- Design thinking process
- User-centered design
- User research basics

Week 3-4: UI Basics

- What is UI Design?
- Design principles (alignment, contrast, hierarchy, etc.)
- Color theory and typography
- Design trends and inspirations
- UI patterns and components

Tools: Figma (start learning), Miro (for UX flows)

Month 2: Research & Wireframing

Week 1: User Research

- Interviews, surveys, observation
- Personas and empathy maps
- Competitive analysis

Week 2: User Flows & Site Maps

- Task flows, user journey maps, sitemaps

Week 3-4: Wireframing

- Low-fidelity wireframes
- Layout planning, grids, spacing

Tools: Figma, Balsamiq, Miro

Month 3: Visual Design & Prototyping

Week 1: Visual Design Principles

- UI kits and design systems
- Typography, color schemes, accessibility, iconography

Week 2: High-Fidelity UI Design

- Mobile/web screens, consistency, responsive design

Week 3-4: Prototyping

- Interactive components, animation basics

Tools: Figma, Adobe XD (optional), Lottie

Month 4: Usability Testing & Iteration

Week 1: Usability Testing

- Moderated/unmoderated testing, A/B testing
- Creating test scenarios, tools (Lookback, Maze, etc.)

Week 2: Analyzing Results

- Heuristic evaluation, feedback analysis

Week 3-4: Iteration

- Updating wireframes and prototypes, design documentation

Month 5: UI/UX Design Systems & Collaboration

Week 1: Design Systems

- What is a design system?, atomic design

Week 2: Handoff to Developers

- Design specs, Zeplin/Figma Inspect, HTML/CSS basics

Week 3-4: Team Workflow

- Agile/scrum, Jira/Trello/Asana, team collaboration

Month 6: Portfolio Building & Capstone Project

Week 1-2: Capstone Project

- Redesign or build a new app/website

Week 3: Build Portfolio Website

- Personal branding, case study writing, hosting

Week 4: Resume & Interview Prep

- Resume writing, interview questions, mock interviews
